

Feng Shui Battery (aka Salt Water Treatment)

INGREDIENTS:

One clear glass jar with a lid or a clear vase, gauze and a rubber band

Coarse salt such as sea salt or kosher salt

Water

6 pennies

1 nickel

Step 1: Fill jar to 1/3 full with salt (see diagram at right)

Step 2: Fill jar to 2/3 full with water (see diagram at right)

Step 3: Leave the final 1/3 air (see diagram at right)

Step 4: Add all the coins.

Step 5: Poke holes in the lid and cover (or use gauze, using rubber band to secure)

Step 6: Place in advised location on a plate to avoid furniture damage as salt may “climb” out of Jar.

Step 7: Monitor and add salt and/or water as needed over time to keep the levels as noted above.

Step 8: Replace after one year, or as advised by a Feng Shui Professional.
Best to dispose of at an off-site location.
